

**Massachusetts State Hazard Mitigation and Climate Adaptation Plan
State Agency Vulnerability Assessment Reference Materials:
Tornadoes**

Data Source: DCAMM Statewide Resiliency Master Plan

The map below shows the density of historic tornado occurrences throughout Massachusetts. This data was collected between 1960 and 2016 and can be considered to represent present conditions of this hazard. There is no established correlation between climate change and tornado occurrence. Consequently, maps for future planning horizons are not provided.
